**RE: ATIPP Request – Water Usage in St. John’s from 9:00 AM on February 28, 2010 12:00AM on March 1, 2010 @ 5 Minute Intervals**  
**Date Received: September 17, 2018**

In 2010, the City of St. John’s was serviced by two (2) bodies of surface water, namely Bay Bulls Big Pond of the Regional Water System and Windsor Lake. The attached graph and data table represents total source water withdrawal from the Bay Bulls Big Pond source **ONLY**. Bay Bulls Big Pond is used to service a large portion of the St. John’s Census Metropolitan Area (CMA) including the municipalities of St. John’s, Mount Pearl, Paradise, Conception Bay South and Portugal Cove-St. Philip’s.

The Windsor Lake source services only the City of St. John’s, however we are unable to obtain any data from this location for the time period requested.
