

Traffic Calming Process

I would like traffic calming on my street. What do I do?

Your first step is to contact the City's Transportation Engineering staff, who will provide more information on the process outlined below and answer any questions you may have.

Not all streets in the City are eligible for traffic calming. Your street may be ineligible for this program if it is too steep, is classified as an arterial that prioritizes traffic movement, or is a short cul-de-sac. City staff will confirm if your street can go through the Traffic Calming Program. If your street is eligible, this flow chart outlines the general steps we follow to determine which streets get traffic calming.
